

**C.C.E. COSTRUZIONI CHIUSURE ERMETICHE S.R.L.**

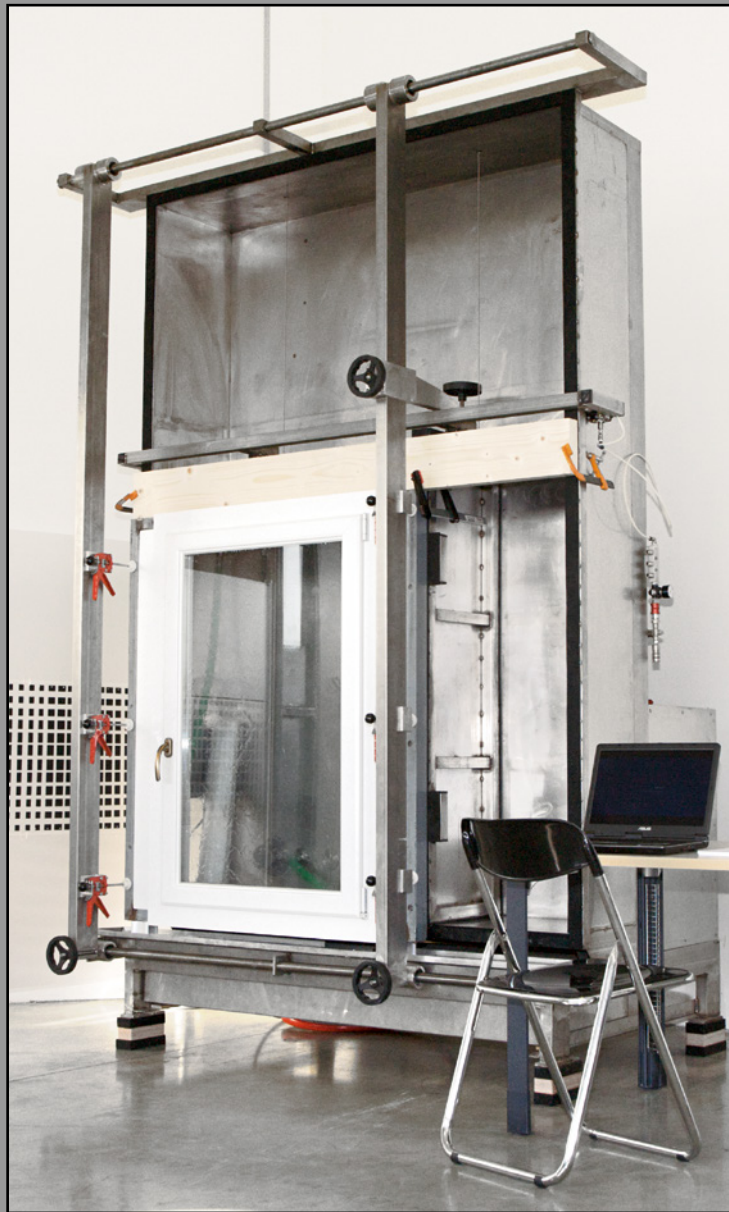

C.C.E. is an Italian company founded in 1980. It designs, produces and sells on international markets a simple and effective device for closing gaps between the door and the floor, called **AUTOMATIC DROP DOWN SEAL**.

# COMMERCIAL NETWORK

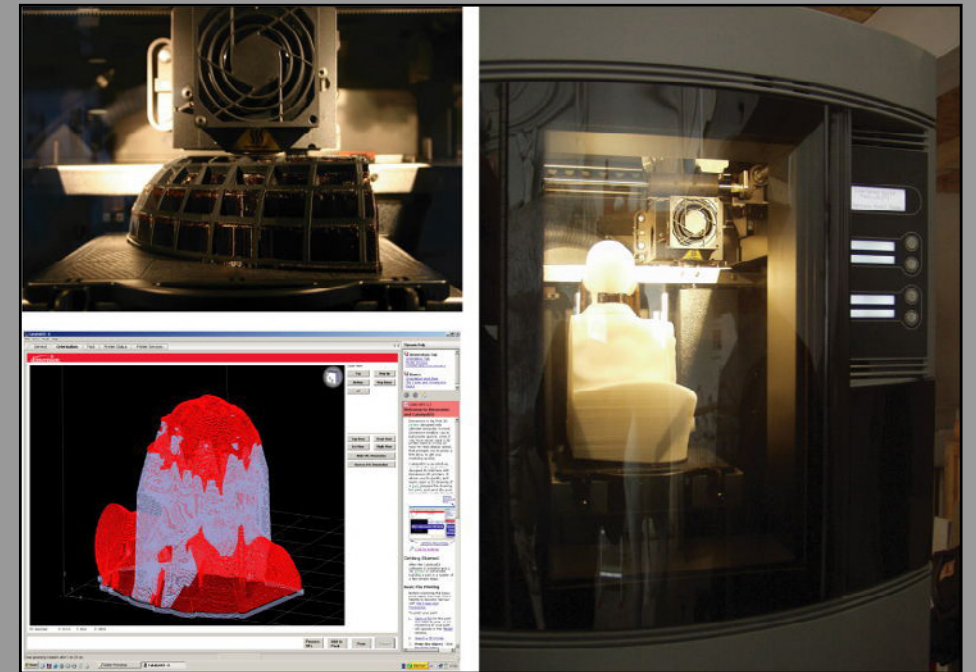

C.C.E. exports in more than 30 countries all over the world, with an ever growing commercial network.

# C.C.E. LABORATORY

To keep up with the increasing request of standards compliance, C.C.E. have an in-house R&D laboratory, with the most advanced instruments and tools.

The laboratory includes a test bench for Air-Water-Wind tightness as in use at notified bodies and a 3D printer for making prototypes.

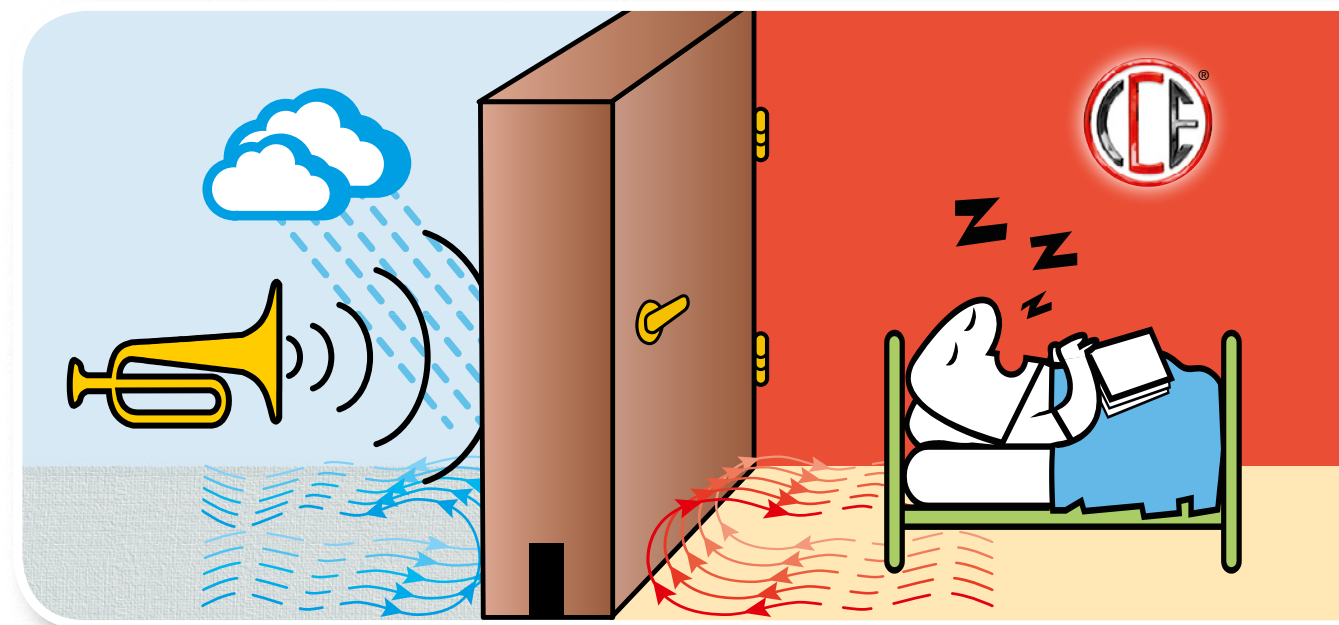

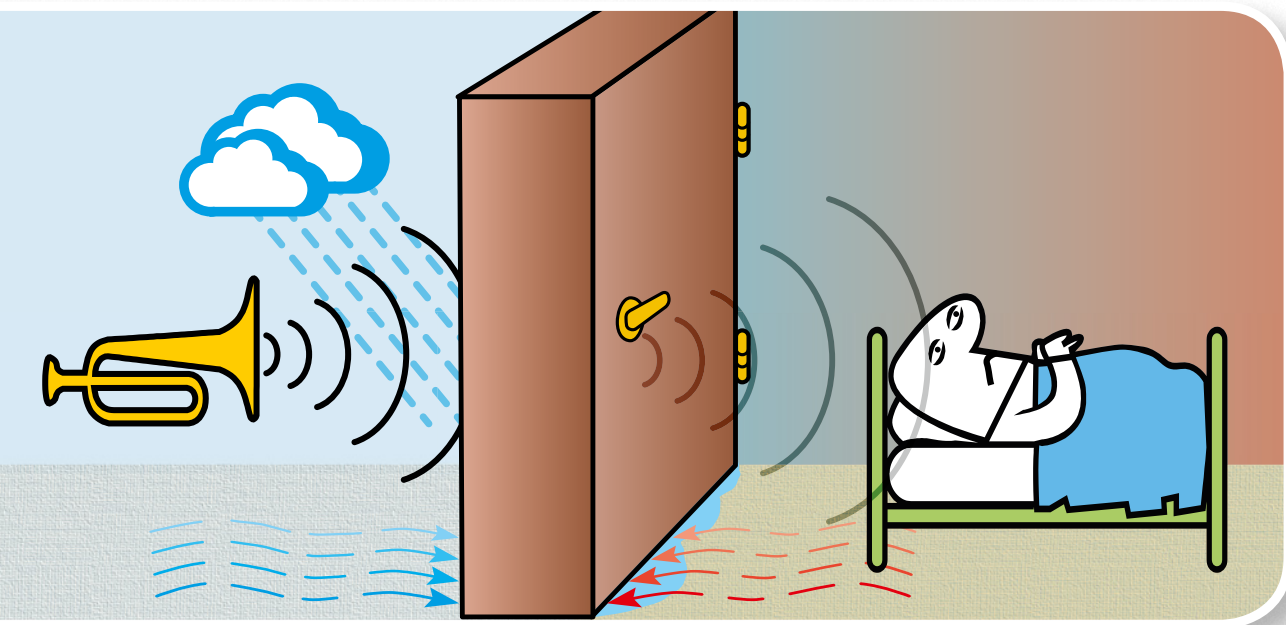

# C.C.E TOOLING AND MOULDING

C.C.E. has an in-house tooling department and a plasting moulding ward which give high flexibility and cost saving for our customers.

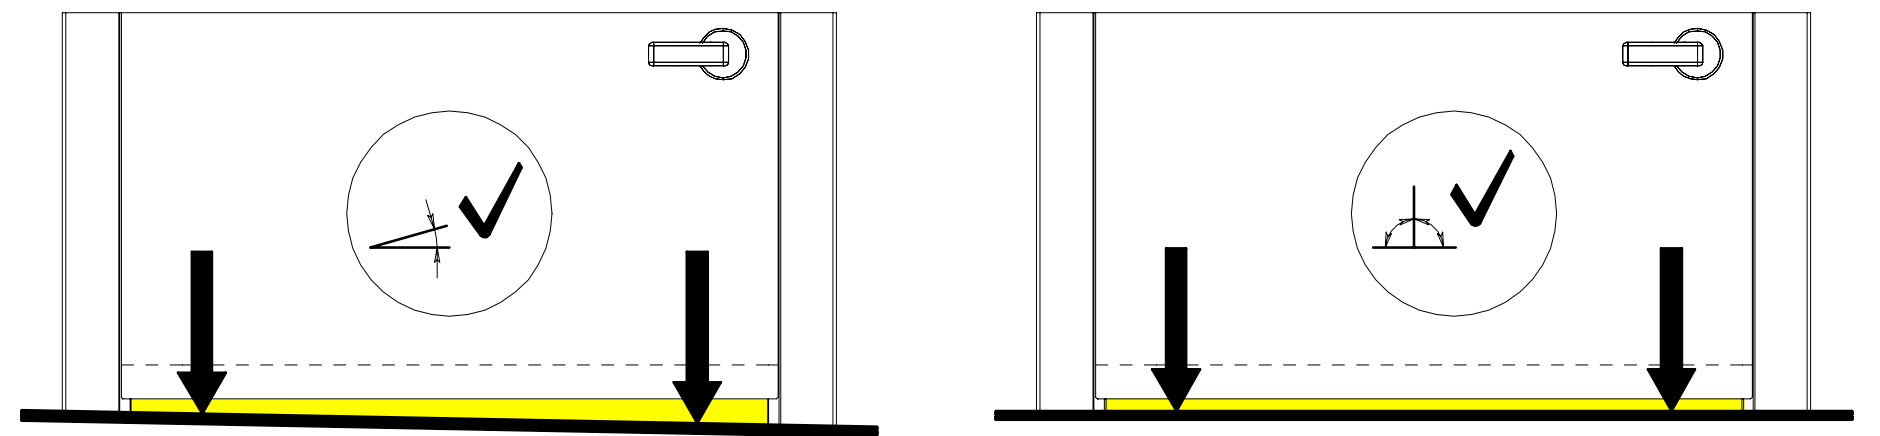

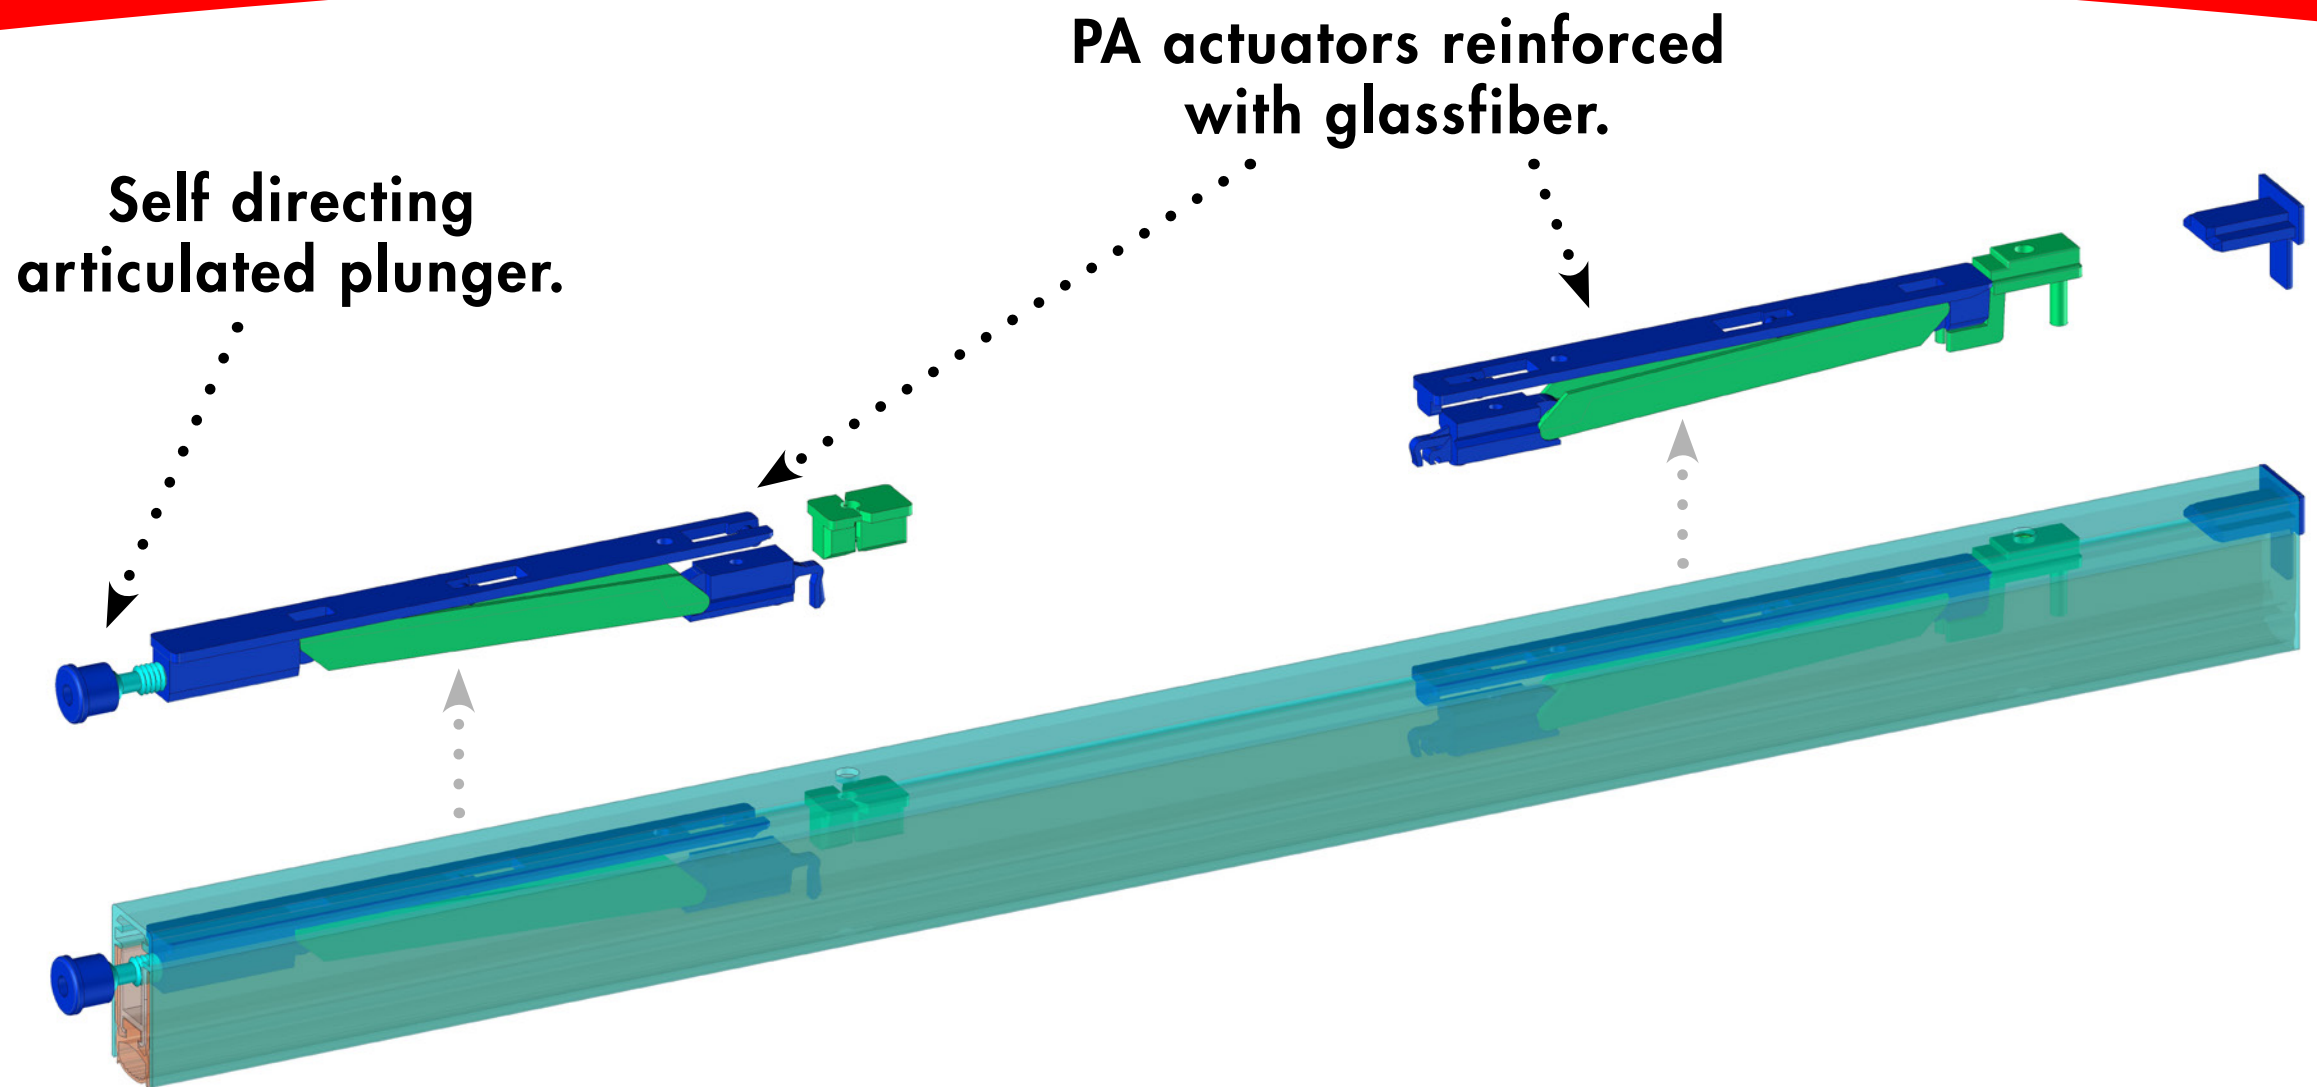

We can study, design and actualize all kind of solution directly from our factory.

# WHAT A DROP DOWN SEAL IS

A drop down seal automatically isolates the space between the door bottom and the floor when the door is closed. The drop down seal protects from air leaks, insects, dust and it's a good barrier against noise.

# WHY BUY C.C.E.?

**Graduated scissor action (seal drops on hinge side before lock side)**

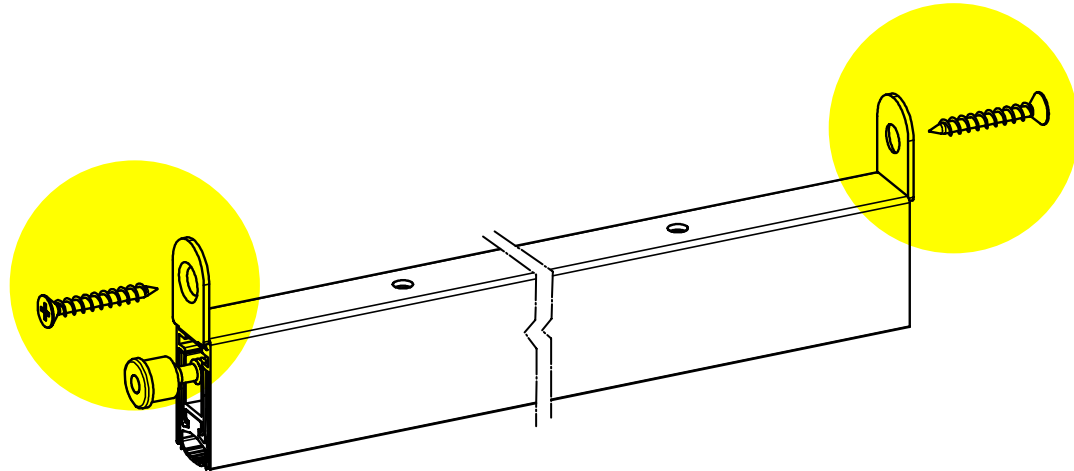

# WHY BUY C.C.E.?

Many fixing styles available.

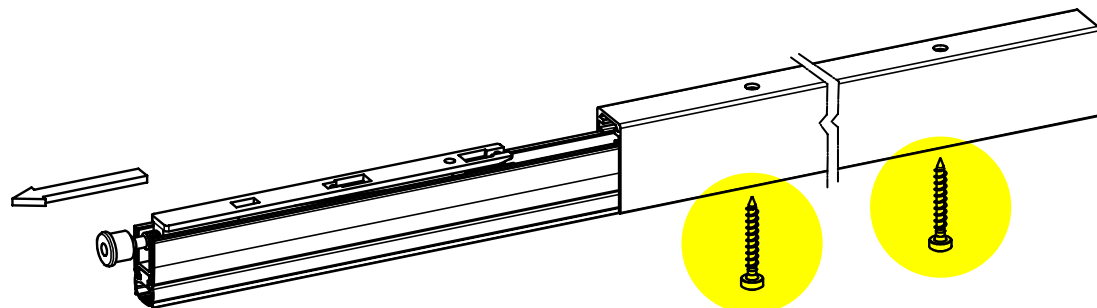

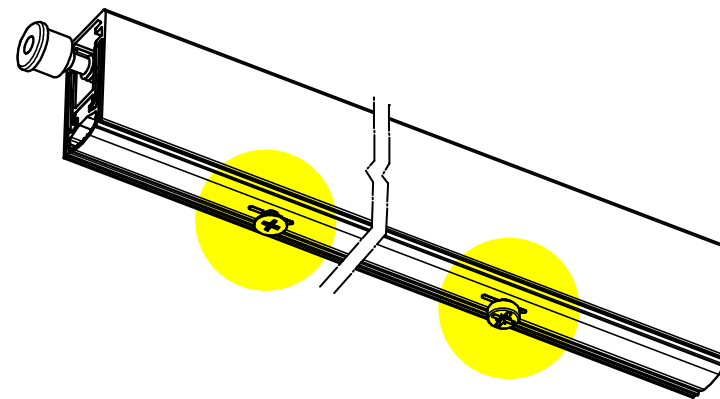

---

**1F.** With front bracket in stainless steel.

---

**2F.** With preassembled woodscrews or self-tapping screws.

**3F.** Removing the seal holding profile.

## GLASS SEALING SYSTEM

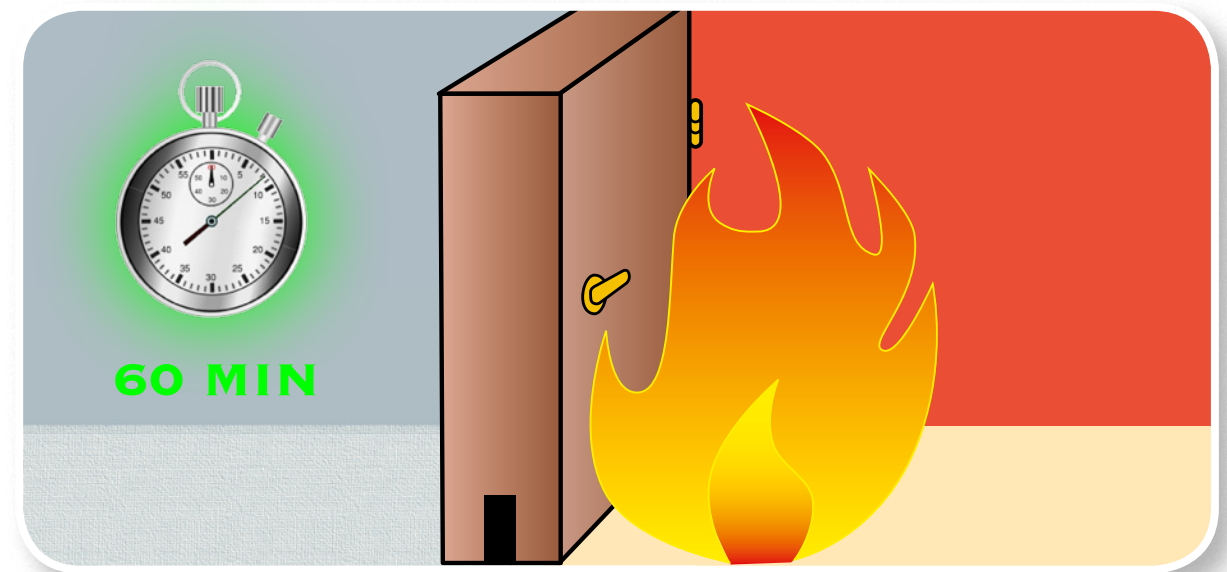

**Drop down seals family with high sound insulation and air leakage resistance.**

- Sound insulation up to 55dB, certified by IFT Rosenheim
- Maximum drop up to 20 mm
- Multiple fixing solutions

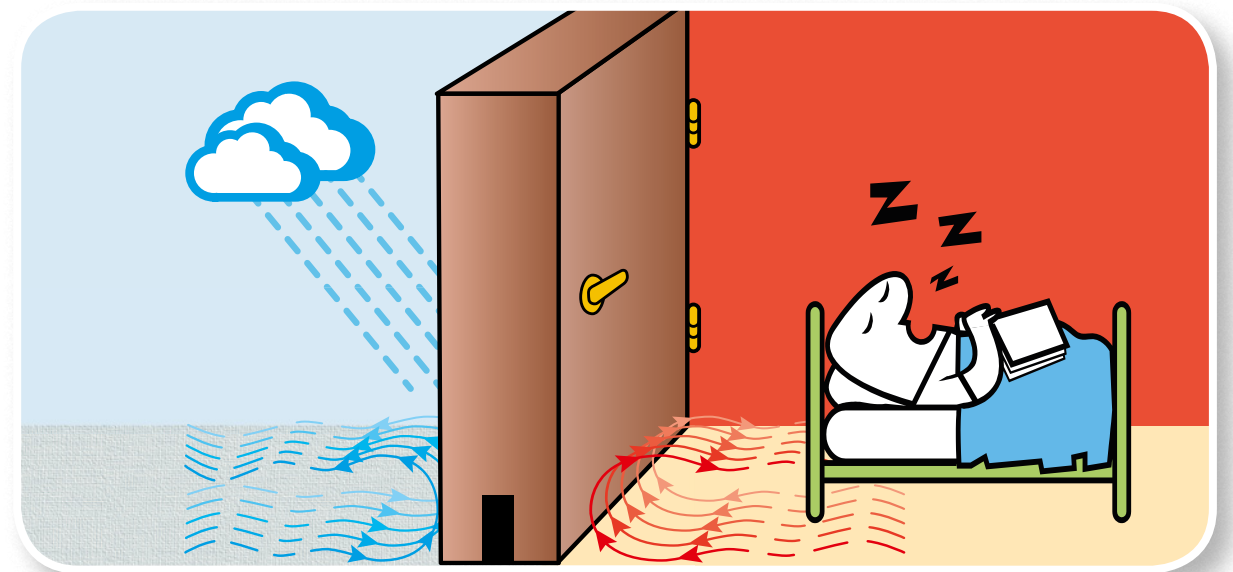

**Drop down seals family with high resistance to smoke and fire, with great sound insulation too.**

- Sound insulation up to 51dB, certified by IFT Rosenheim
- Fire resistance up to 60 minutes, certified by IFC Cambridge UK
- Multiple fixing solutions

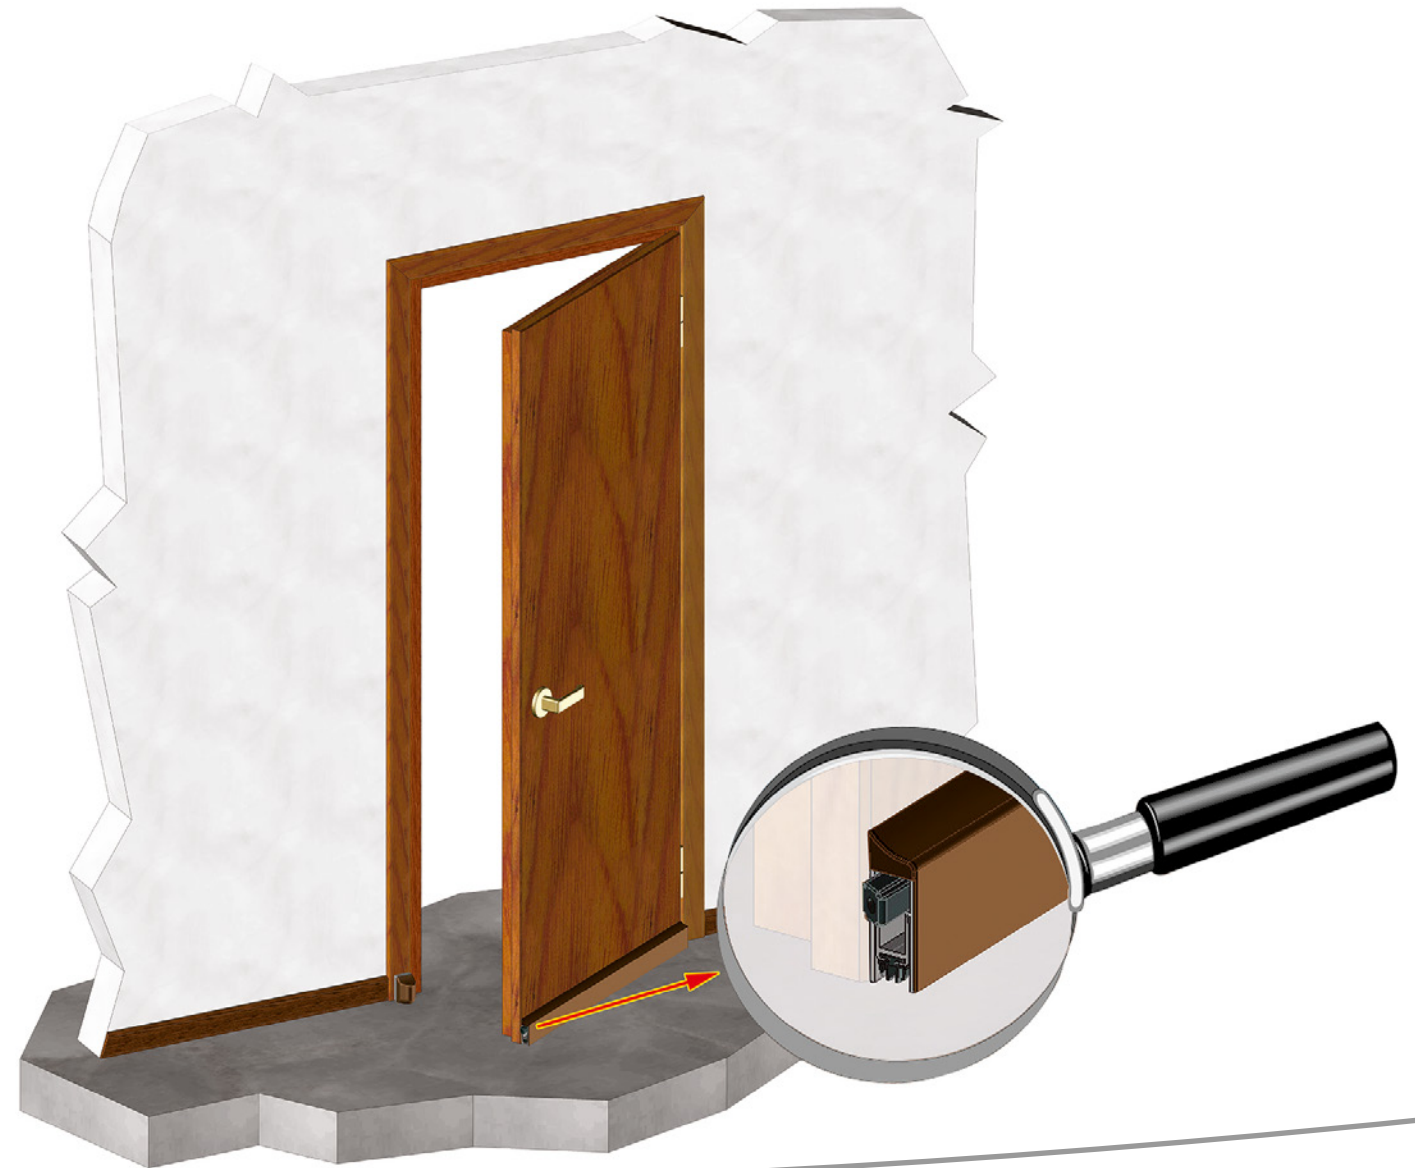

Drop down seals family with high quality/price ratio suitable for all kind of doors.

- Sound insulation up to 44 dB, certified by IFT Rosenheim
- Multiple fixing solutions

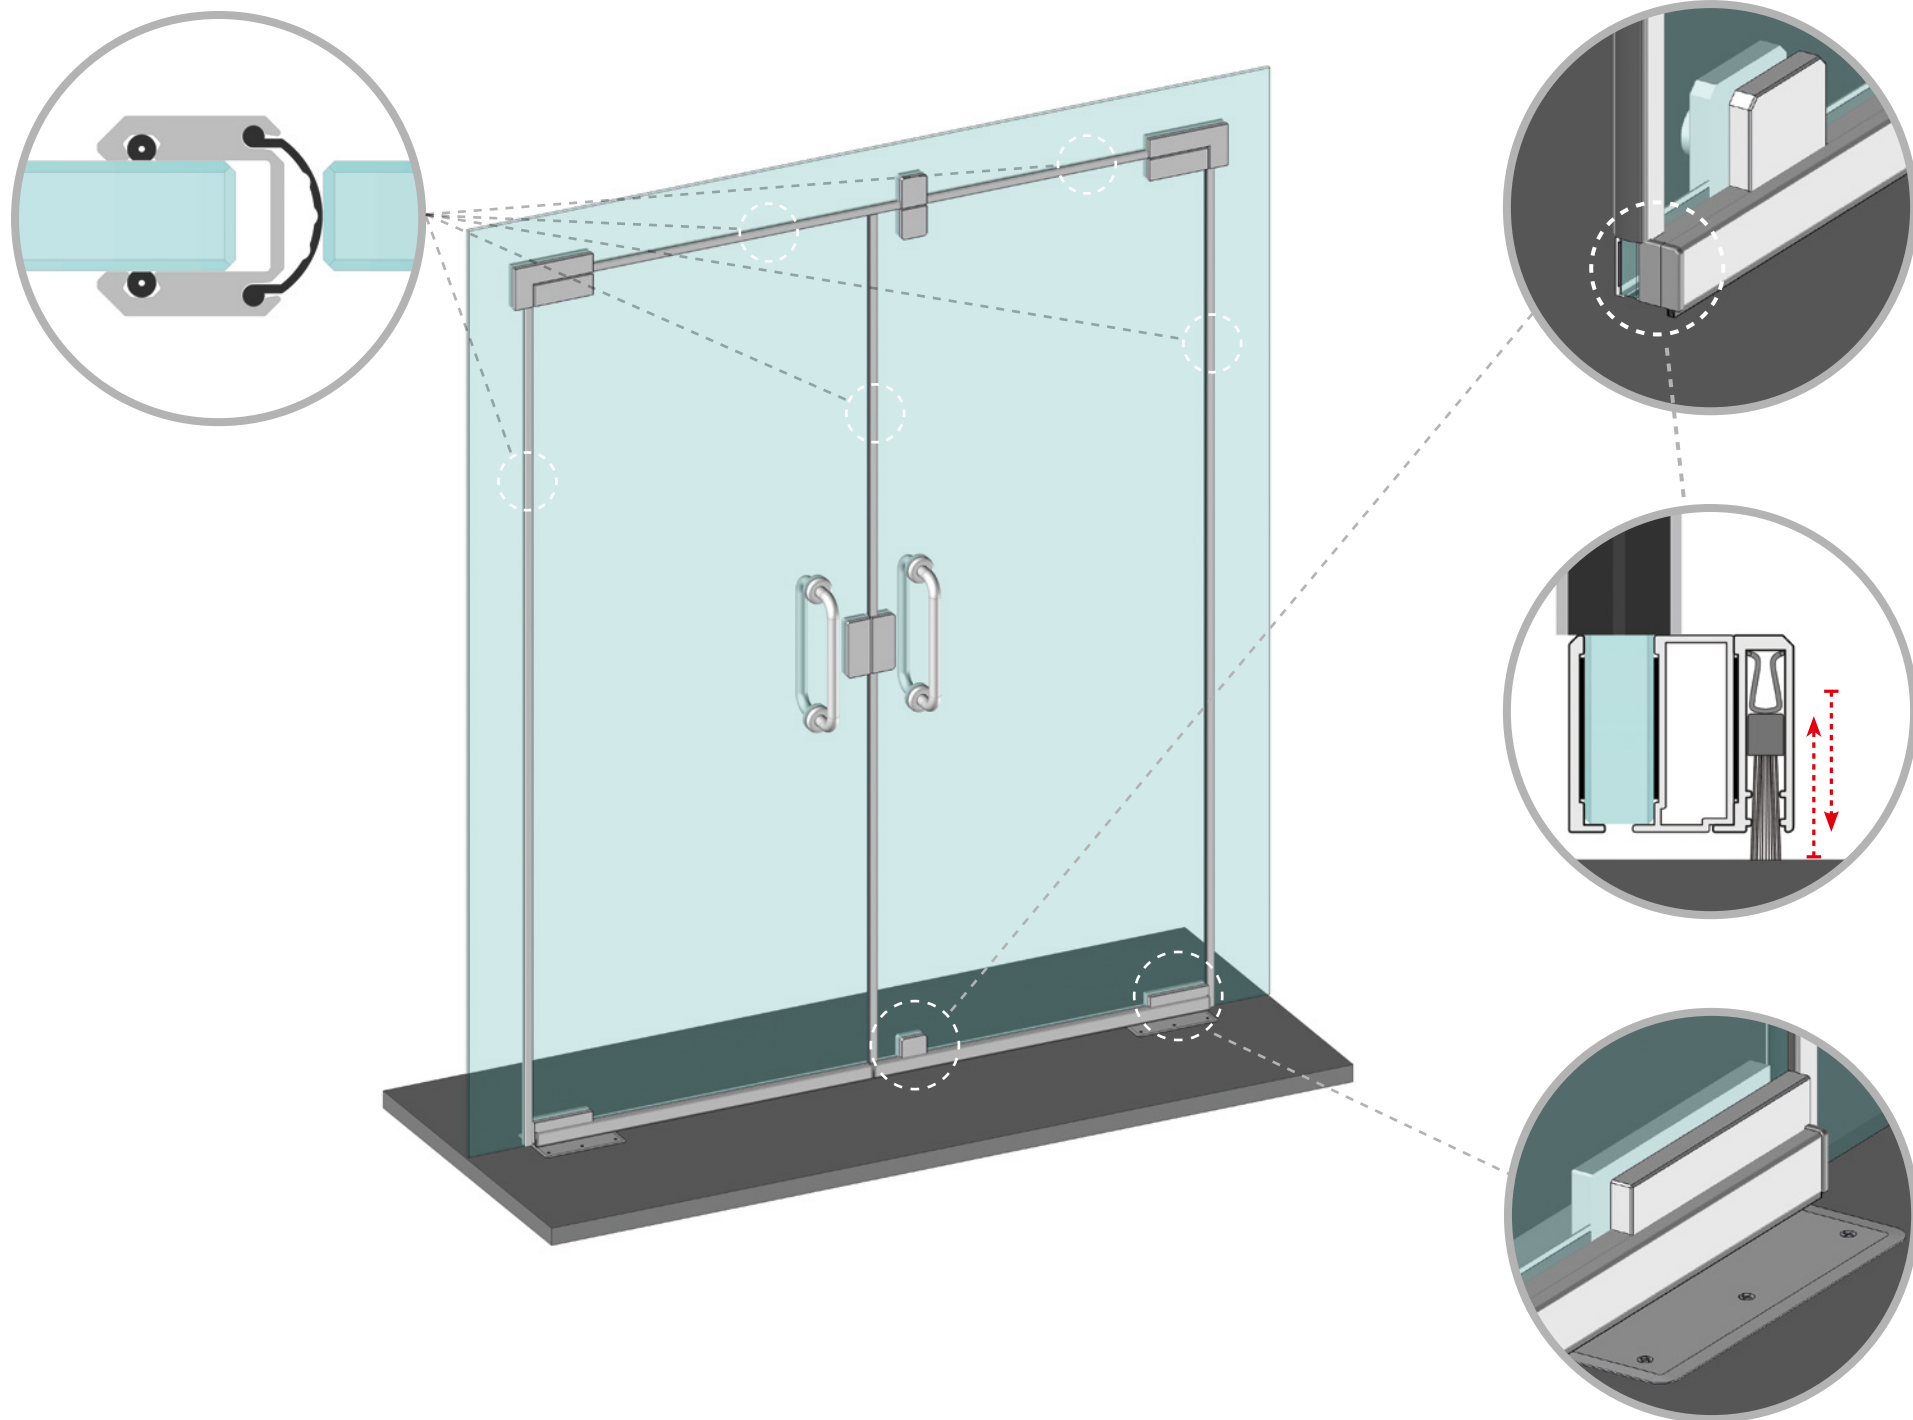

**Drop down seals family for easy face-mounted installations on existing doors and for the DIY world.**

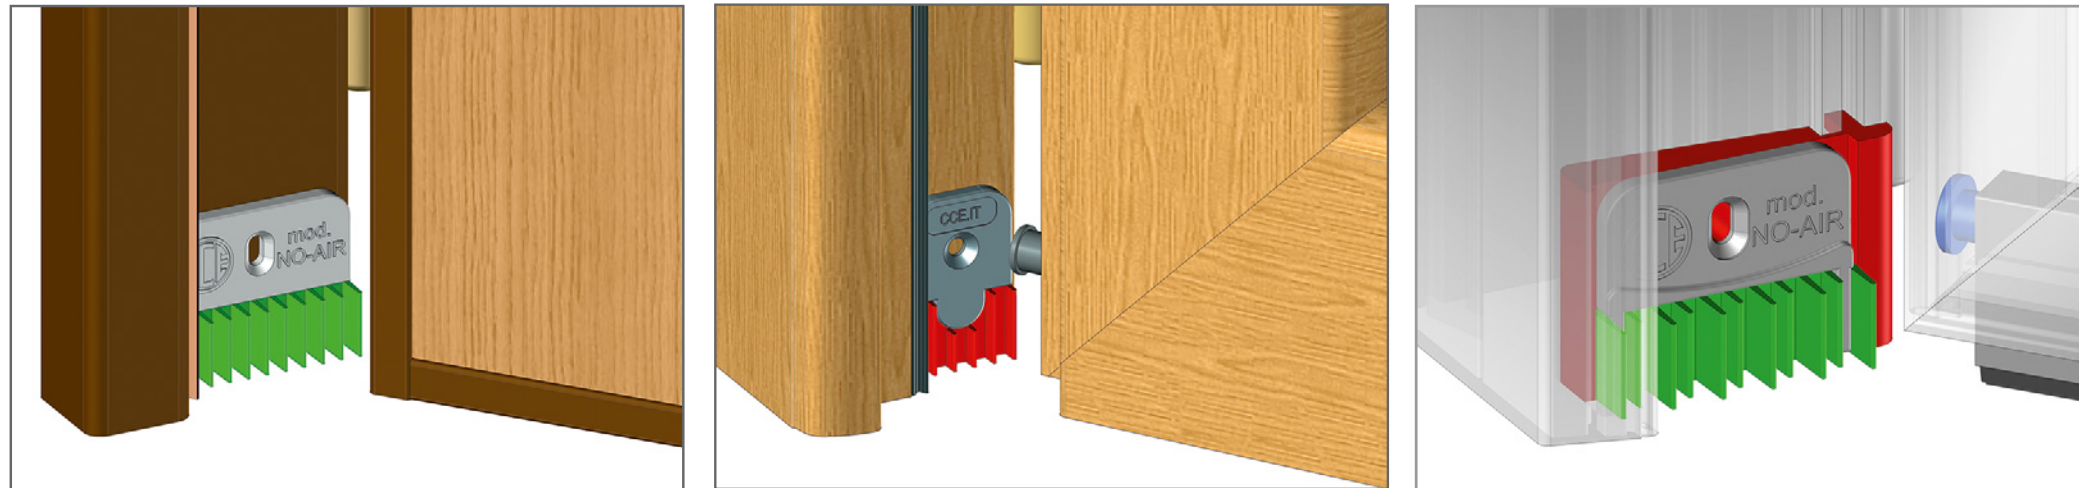

# GLASS SEALING SYSTEM

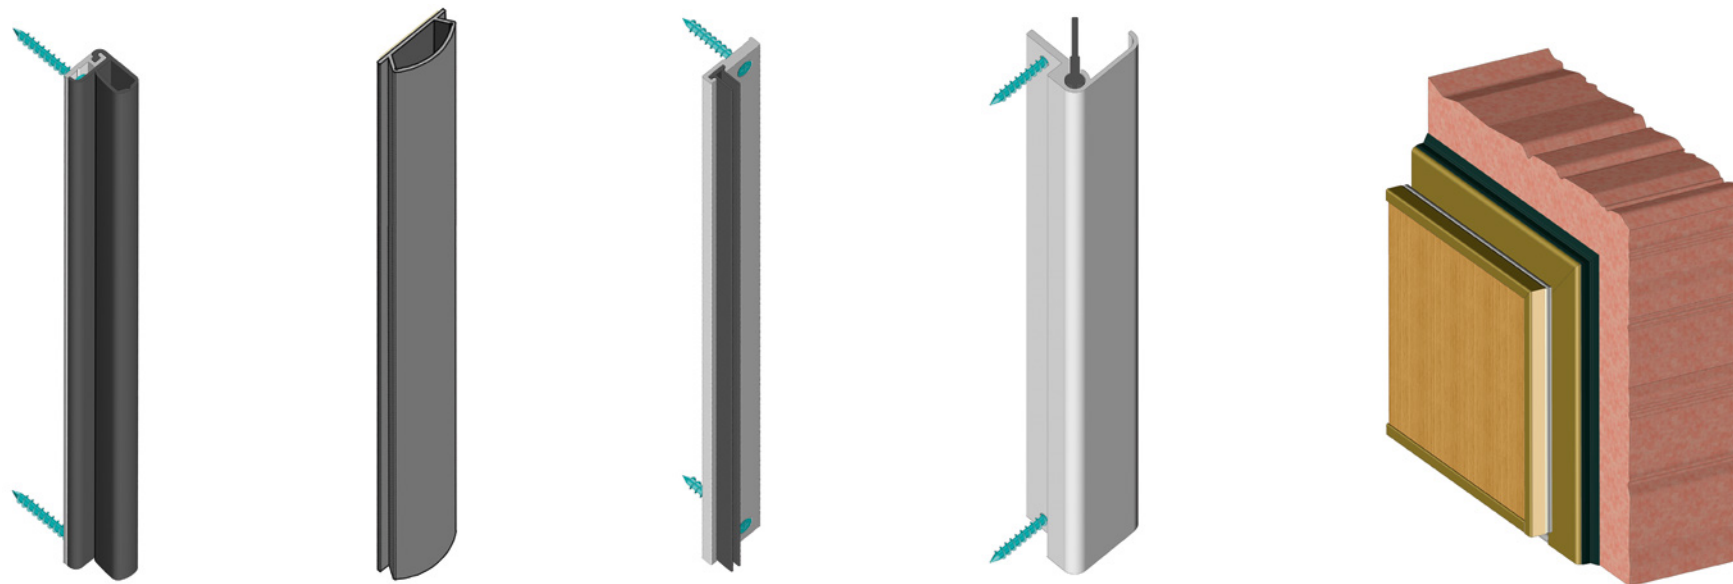

It's an innovative and complete system to close gaps below and around glass doors, both pivoting or non-pivoting.

# ACCESSORIES

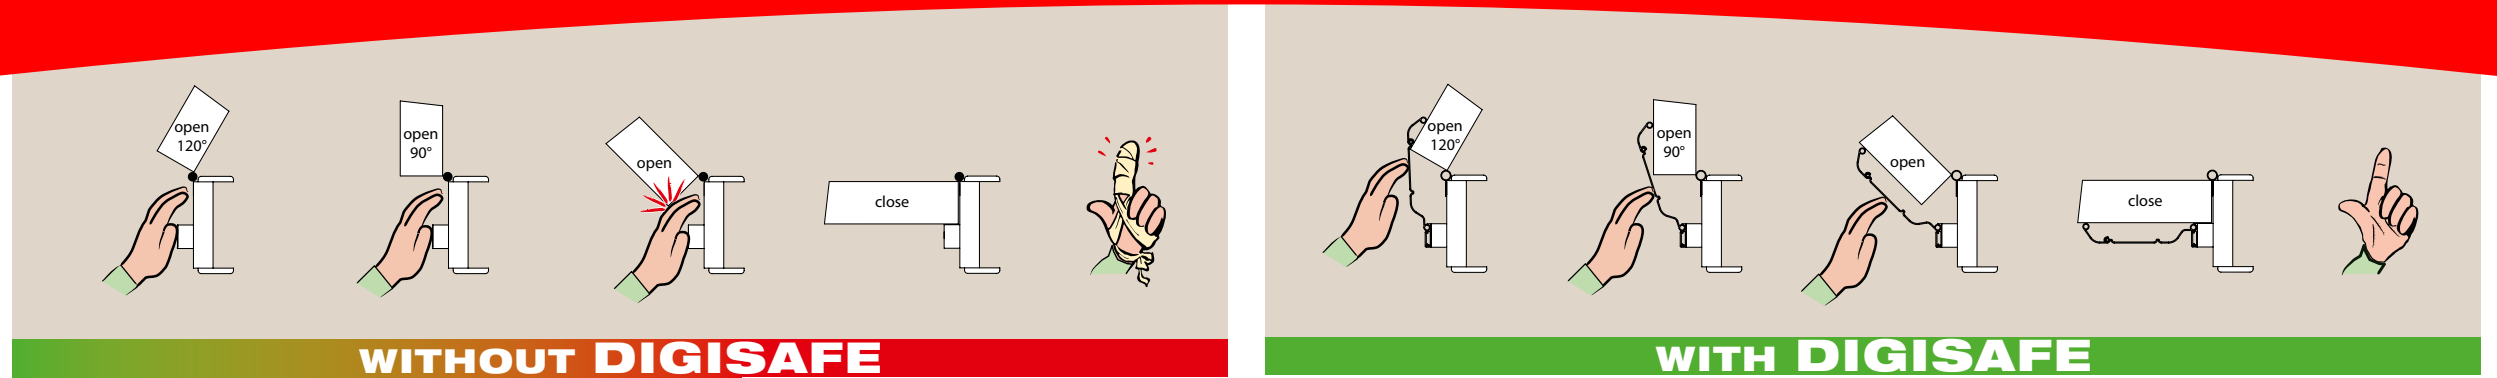

No-Air family has several different solutions to close the gap between the frame and the drop down seal, suitable for security doors, wood doors and PVC doors. Reduce air leakage and increase the sound insulation up to 3dB. ( certified by IFT Rosenheim).

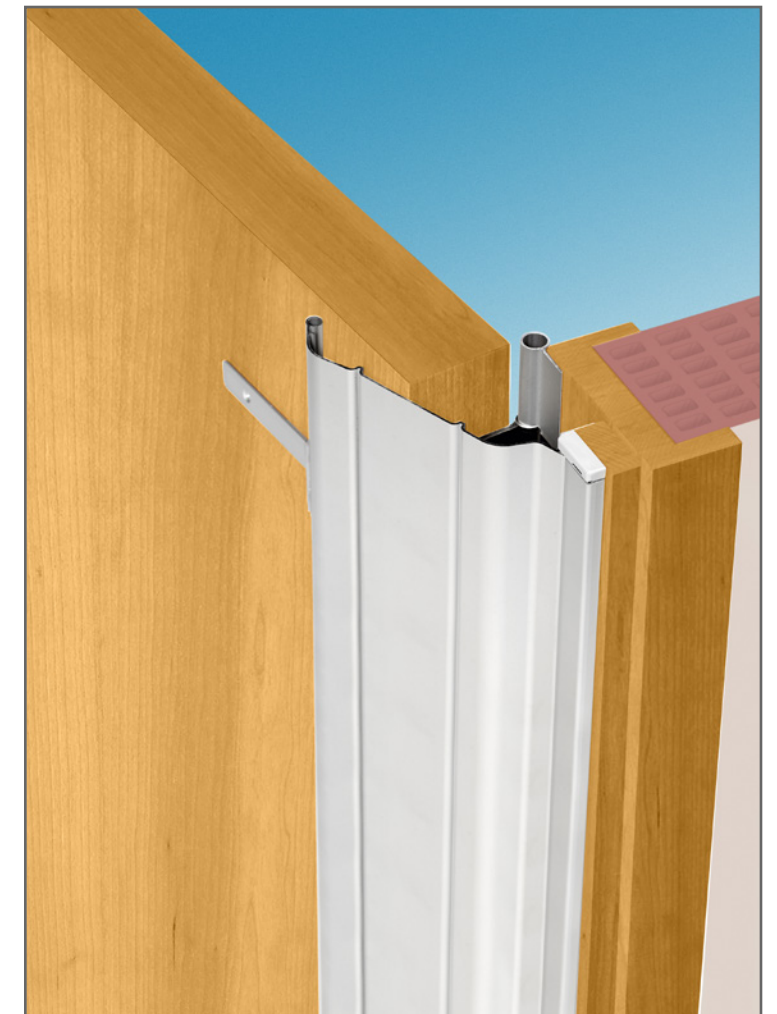

C.C.E. produces a range of different seals to be put on door frames. They increase sound insulation and stop air leakage.

# DIGISAFE

Digisafe family is composed of many protection systems that prevents fingers from being pinched on door's hinge, it should be applied on the internal part of the hinge side of all types of doors. Digisafe is the ideal product to ensure safety at home or in public places such as hotels, hospitals, public offices and schools.
